## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24, drawn to polynucleotides and means of expression, classified in class 435, subclasses 69.1, 320.1, and 325, and class 536, subclass 23.5.
- II. Claims 25-37 and 43-47, drawn to polypeptides and a method of use, classified in class 530, subclass 350, and 514, subclass 2.
- III. Claims 39-42, drawn to antibodies and methods of generating them, classified in class 530, subclass 388.1 and 389.1.

The inventions are distinct, each from the other because of the following reasons:

The polynucleotides of Invention I are not related to the polypeptides of Invention II.

They differ structurally and functionally, cannot be used together or interchangeably, and have non-coextensive searches and considerations. Further, the polynucleotides of Invention I cannot be used in the methods of Invention II.

The polynucleotides of Invention I are not related to the antibodies of Invention III. They differ structurally and functionally, cannot be used together or interchangeably, and have non-coextensive searches and considerations. Further, the polynucleotides of Invention I cannot be generated by the methods of Invention II.

The polypeptides of Invention II are not related to the antibodies of Invention III. They differ structurally and functionally, cannot be used together or interchangeably, and have non-coextensive searches and considerations. Further, the antibodies of Invention III cannot be used

Art Unit: 1646

in the methods of Invention II and the polypeptides of Invention II cannot be generated by the methods of Invention III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the searches required for the different groups are different, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Janet L. Andres whose telephone number is 703-305-0557. The examiner can normally be reached on 8:00-5:30.
